

CORRECT BALL POSITION

Ball Position is different with most of your clubs...

Improper ball position will lead your ball astray. If your ball position is incorrect, your club will make impact with the ball in the wrong spot, or you may start to overcompensate with your body to adjust (which you don't want to do).

RULE OF THUMB:

The longer the club, the more forward in your stance it goes. You don't want to go any further than the instep of your left foot (right foot if you're left handed).
