

My ball landed next to the bunker rake...

A bunker rake is considered a movable object, which the player may remove, **WITHOUT PENALTY**, in accordance with Rule 24-1.

If the ball moves, it must be replaced.

If the ball is resting solely on the rake then Rule 24-1b permits the player to lift the ball, remove the rake, and drop the ball as nearly as possible to the spot directly beneath where the ball lay on the rake but not nearer the hole (perform a legal drop).

You can actually clean your ball here too!

If the ball is touching the sand in the bunker then the rake may be removed the same as if it were touching it in the rough.
